***Election/Restrictions***

The restriction mailed on 6/27/08 has been withdrawn in view of new restriction requirement shown below:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 46-59 and 88-90, drawn to method, classified in class 29, subclass 700.
- II. Claims 60-74, drawn to kit, classified in class 12, subclass 208.
- III. Claims 75-76, drawn to adapter, classified in class 227, subclass 107.
- IV. Claims 77-87, drawn to clip, classified in class 248, subclass 74.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and IV are related as method and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the method as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different method. (MPEP § 806.05(e)). In this case the apparatus can be used as a paper holder to keep plurality of papers together.

Inventions II and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the electrical cable can be secured to a fixed surface by nail from the nail gun. The subcombination has separate utility such as electrical cable clip.

Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination IV has separate utility such as electrical cable clip. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
